

You and your colleagues are invited to a **Clinical Education Breakfast**

- Continuing Education Certificates available
- Enjoy a light breakfast
- For Clinicians involved in the insertion and care of Central Venous Lines

Kimberly-Clark*
**Education
FOUNDATION**

Speaker:

Hailey Samuels

Hailey Samuels is a registered nurse who has worked in the Critical Care

arena for 22 years. During this time Hailey has held various roles, many at an advanced practice level.

With a strong commitment to ongoing education, Hailey has completed a Graduate Certificate in Intensive Care, a Master of Nursing – Critical Care, and is currently enrolled in a Master of Nursing – Nurse Practitioner.

Hailey coordinates the Vascular Access Service and is involved in inserting and teaching the insertion of Central Venous Catheters in the hospital where she currently works.

“Improving the odds:

You can help reduce central line complications”

8.45am – 9.45am Monday 9 September 2011 Light breakfast included

Health care practitioners universally recognise the significance of Catheter-Related Blood Stream Infections. By attending this workshop you'll be able to:

- Describe the realm of Central Venous Catheters (CVC)
- Understand the insertion procedure
- Identify CVC-related complications (thrombosis and infections)
- Understand best practices in infection prevention

Continuing Education Certificates will be available on request.

Venue

**Fisher and Paykel
Healthcare Clinical
Education Centre**

**Level 5, Building 32
Auckland City Hospital**

RSVP by 2 September 2011
